Anti-mosquito and horsefly

For horses

The spray protects your horse from horseflies, flies, mosquitoes and other biting insects. The high-performance insect repellent with plant-based active ingredient offers revolutionary protection that is extremely powerful and long-lasting.

Reliable

- Extremely strong effect
- A happy horse - for a relaxed ride
- Developed and tested by riders
- Leaves no residues on the hair

Safe

- 100% plant-based active ingredient
- With urea and aloe vera

Use:

Shake before use. Spray on pump spray evenly from a short distance - the amount applied affects the duration of effect. It is recommended to use an application quantity of 1 ml for the area of 250 cm². Do not spray on eyes, nostrils, mouth or open wounds. If necessary, the application can be repeated without a safety waiting period. Repeat application after prolonged contact with water or heavy sweating.

With correct external application, the product is suitable for use in competitive sports. Please note the current doping guidelines of the FN.

Warnings and first-aid measures:

Read the identification label before use. For external use only. Do not spray directly into the face. Do not swallow. Please keep out of the reach of children. In case of skin irritation or rash: Consult a doctor/seek medical assistance. In the event of eye contact, rinse thoroughly with water. Consult a doctor should complaints persist. Contains CITRONELE OIL. Can cause allergic reactions. Dispose of contents/container at a collection point. Store at room temperature.
