Skin and Coat Treatment for Horses

Food supplement

to support the regeneration of skin and coat (skin organs)

Useful information:

The skin and everything that goes with it, such as hair, sebaceous glands and sweat glands, form a protective but easily damaged and vulnerable surface. tierlieb Skin and Coat Treatment helps to regenerate the skin and coat and restore their functions. The nutrient complex supports the body's defences and helps to maintain healthy horse skin.

- Use to treat eczema, injuries, hair loss, infections, dermatitis and allergic reactions
- Helps to restore healthy skin
- Promotes a healthy, beautiful coat
- Eliminates micronutrient deficiencies
- Flavoursome

Composition: Dried grasses and herbs, inactivated brewer's yeast, linseed cake, ground garlic, dried seaweed, molasses, linseed and camelina oil.

Analytical contents: Raw protein 22.1 %, crude fat 4.8 %, crude ash 8.9 %, crude fibre 11.1 %, sodium 0.3 %.

Nutritional additives/kg:

DL-methionine 40,000 mg, Zinc 6,000 mg (protein hydrolysate zinc chelate, 3b612), Copper 1,500 mg (copper II) Amino Acid Chelate Hydrate, 3b406), Vitamin C 8,000 mg, Vitamin E 3,000 mg, β -carotene 500 mg, Vitamin B1 470 mg, Vitamin B2 310 mg, Niacinamide 1,200 mg, Calcium D-pantothenate 790 mg, Vitamin B6 390 mg, Folic acid 410 mg, Biotin 46 mg, Vitamin B12 4.0 mg.

Feed recommendation:

For regeneration in case of acute problems:

Large horses (600 kg) approx. 70 g daily (1 large handful of pellets). Feed for up to 8 weeks.

As a long-term course of treatment:

Feed approx. 50-70 g daily per horse (600 kg).

To maintain a healthy skin, and the natural colour and structure of the coat:

Mix approx. 70 g into the main feed 1-3 times weekly.

Small horses: approx. 50 g per ration.

Because of the increased content of vitamins and trace elements compared to complete diets, the recommended amount of feed should not be increased. Care should be taken to ensure a balanced composition of the daily ration. Before using or extending the feeding period, please seek the advice of a veterinarian. Recommended waiting time according to ADMR: 48 h.

Keep dry and out of direct sunlight. Store below 25°C.
