

Hyaluronic Acid Hand Cream

For soft and beautiful hands,
Wrinkle reducing cream with visible "lifting effect".

Hyaluronic acid is a genuine multi-talent! As a natural substance it is present in every tissue of the body. It is very much appreciated for its cosmetic properties, because it can draw an enormous amount of moisture to itself and also stimulates collagen formation. This encourages skin elasticity and improves skin texture and helps to smoothen lines and wrinkles. This way, the skin is plumped from within, what makes it noticeably smoother, firmer and tighter.

Allantoin, collagen and precious Rosehip seed oil with its high content of linoleic and alpha linolenic acid help you to counter skin aging and thus have a soothing effect on the hands, make them look beautiful and well-groomed. The cream is well absorbed.

Leaves a pleasant, delicate fragrance on your skin.
